

DOPS Full Form In Medical

DOPS Stands For **Direct Observation Of Procedural Skills**

What is DOPS? Or DOPS assessment?

Direct Observation Of Procedural Skills is a scientifically proven method used for assessing competence in the practical procedures that trainees undertake.

In this assessment, different assessors assess the training using a wide range of procedures. Hence these curriculums are set up by the assessor and accordingly, the assessed has to go through all these tests, and then grades are awarded based on his performance after complete analysis.

There are different Standards for assessment:

Trainees must be assessed against the standard expected of a trainee at the end of the stage of training that they are in. Stages of training are normally defined as:

Stage A: ST1 (full outline of competency is available in the curriculum). The trainee will be developing a comprehensive understanding of the principles and practices of the specialty under direct supervision.

Stage B: ST2 and ST3 leading to the Part 1 examination. The trainee will have acquired a good general knowledge and understanding of most principles and practices under indirect supervision.

Stage C: ST3 onwards leading to the Part 2 examination. The trainee will be undertaking further specialized general training.

Stage D: Meets the requirements of the CCT program. The trainee will have in-depth knowledge and understanding of the principles of the specialty.

The following grading scale must be applied to the assessment criteria for each workplace-based assessment tool. If a criterion is not applicable, the assessors should tick 'unable to comment'.

Grading scale

The form offers a grading scale from 1-6:

- 1-2 Below expectations
- 3 Borderline
- 4 Meets expectations
- 5-6 Above expectations

Hence the result and grading scores are given to the students.

Other Full Form of DOPS:

DOP	Degenerate Oligonucleotide Primed
DOP	Direct Occipito-Posterior
DOP	Dextrorphan
DOP	4-deoxypyridinoline
DOP	Date of Procedure
DOP	Day of Pregnancy
DOP	Deamidase Of Pup
DOP	Degree Of Paraxiality
DOP	Degree of Polarization
DOP	Delineation of Privileges
DOP	Delta Opioid Peptide
DOP	Delusion of Parasitosis
